Confusion Surrounds Pathways

Graduating seniors unsure about paper requirements

Angeles Oviedo
THE SANTA CLARA

This past Monday marked the soft deadline for the Pathway Reflection Essays, and roughly half of the graduating class has yet to submit their work.

According to Assistant Provost for Undergraduate Studies Phyllis Brown, 270 students submitted their assignment over the past weekend and on the day of the deadline, joining 265 others whose assignments have already been approved and 36 who are expected to revise and resubmit their essays.

Last week Associate Student Government Representative Jesse Wackerbarth met with Brown to discuss postponing the deadline due to students' concern with the deadline date. According to Brown, the deadline remained unchanged in order to avoid further confusion among seniors, but that there would be no penalty for missing the deadline.

"The deadline was set very explicitly to

CLUB BRONCO RETURNS

SAMANTHA JUDA — THE SANTA CLARA

Senior Jackie Gage and musicians Will Bohrer and Chris Main, three of the five members of "The Jurassic," performed at the kick-off event for Club Bronco, last night. The first Club Bronco event of the year, called SCU Unplugged, was part of the kick-off for The Office of Sustainability's Energy Challenge. Students were able to earn points for their Residential Learning Communities for the challenge, make crafts with Locatelli Late Night Events, listen to live band performances sponsored by KSCU, and win raffles from the Office of Sustainability. Performances at Club Bronco will occur weekly for the rest of the school year.

Cowell Battles to Meet Vaccine Demands

Number of flu patients dramatically increased

Mallory Miller
THE SANTA CLARA

Forget Zumba. The big health craze at Santa Clara this year is the flu vaccination.

The Cowell Student Health Center has administered 271 vaccinations so far this year, three times the amount given out last year. They've been in such high demand that sometimes Cowell can't even keep a full stock for a day.

"At one point, Cowell received a shipment of 50 vaccinations," said staff physician, Dr. Lauren Hi-

dalgo. "Two hours later we ran out because so many students rushed in to get the shot. But now we are currently stocked with more vaccinations."

Cowell wasn't the only center to run out of vaccines. Local pharmacies ran out of stock this year as well. In fact, numbers from the Center for Disease Control show that the western region of the United States are still seeing widespread flu cases.

Students that live in dorms are especially at risk for the flu due to the tight living quarters. Students who go to class sick also risk exposing classmates to the virus, although the fast-paced quarter system can make it difficult to miss class.

"I just got over the flu about a week ago," said freshman Connor Yim. "I still went to class when I

had it though because I didn't want to miss lectures and get counted absent by my professors."

Students who are not feeling well, especially those with fever, should not be attending class and exposing healthy students to the virus, according to experts.

"This requires cooperation and understanding from professor and administrators," said Hidalgo. "If students don't go to class sick, it would be really helpful in preventing the spread of the virus."

Every year, anywhere between five and 20 percent of people living in the U.S. will get the influenza virus. This year the flu has been spreading more quickly, about five weeks ahead of the average season.

Contact Mallory Miller at memiller@scu.edu or call (408) 554-4852.

PHOTO ILLUSTRATION BY RYAN SELEWICZ — THE SANTA CLARA

Flu vaccines from Cowell have already been administered three times more than last year. This year, the flu has been spreading faster and is more aggressive than most.

OUR POLICIES
The Santa Clara is the official student newspaper of Santa Clara University. The Santa Clara is written, edited and produced by students once weekly, except during holidays, examination periods and academic recesses. The Santa Clara welcomes letters to the editor from readers. Letters can be delivered to the Benson Memorial Center, room 13; mailed to SCU Box 3190 or emailed to: letters@thesantaclara.com.
Our letters policy:
▶ Submissions must include major and year of graduation and/or job title, relation to the university and a phone number for verification.
▶ Letters should not exceed 250 words. Those exceeding the word limit may be considered as publication as an article or in some other form.
▶ Anonymous letters will not be considered for publication.
▶ The Santa Clara reserves the right to edit letters for grammar, clarity and accuracy, or to shorten letters to fit the allocated space.
▶ All letter submissions become property of The Santa Clara.
▶ The deadline for publication in Thursday's edition is the prior Saturday.
Nothing on the opinion pages necessarily represents a position of Santa Clara University. Letters, columns and graphics represent only the views of their authors.
The Santa Clara has a minimum newspaper circulation of 2,000. One free copy. Additional copies are 25¢.

WORLD ROUNDUP

AP

1. Brazil police say outdoor flare started club fire: Penny-pinching by a band known for its onstage pyrotechnic displays may have cost more than 230 people their lives at a nightclub in southern Brazil, according to a police inspector leading the investigation into this weekend's deadly blaze.

Inspector Marcelo Arigony told reporters at a news conference Tuesday that members of the band knowingly purchased flares meant for outdoor use because they cost a mere \$1.25 a piece, compared with the \$35 price tag for an indoor flare.

The blaze began at around 2:30 a.m. local time, during a performance by Gurizada Fandangueira, a country music band that had made the use of pyrotechnics a trademark of their shows. The band's guitarist told media that the 615 square-meter (6,650 square-foot) club was packed with an estimated 1,200 to 1,300 people. The police have said the capacity for a club of that size is under 700 people.

The Rio Grande do Sul state forensics department raised the death toll Tuesday from 231 to 234.

From AP Reports.

2. Australians clean up from floods, supplies dwindle: Military personnel headed to flood-ravaged northeast Australia on Wednesday to help clean up the sludgy aftermath of floods that damaged thousands of homes and businesses, leaving communities short of power, food and water.

Floodwaters were receding in most areas, bringing relief to a region that was battered by worse floods two years ago. But there were concerns about food and water shortages in some communities, thousands were

without power and police were desperately hunting for two men who vanished while traveling through floodwaters earlier this week. Four flood-related deaths were confirmed previously.

The flooding, caused by the remnants of a tropical cyclone, forced around 7,500 Bundaberg residents from their homes, inundated 2,000 houses and 200 businesses with murky water and prompted helicopter evacuations of 1,000 people.

From AP Reports.

AP

3. Genetics may explain severe flu in Chinese people: A genetic variant commonly found in Chinese people may help explain why some got seriously ill with swine flu, a discovery scientists say could help pinpoint why flu viruses hit some populations particularly hard.

Less than one percent of Caucasians are thought to have the gene alteration. Yet about 25 percent of Chinese people have the gene variant, which is also common in Japanese and Korean people.

Researchers analyzed 83 patients admitted to a Beijing hospital during

the 2009-2010 swine flu pandemic. Of those with serious complications like pneumonia or kidney failure, 69 percent had the genetic alteration.

Director of the Weatherall Institute of Molecular Medicine at Oxford University Andrew McMichael estimated that people with the genetic variant were five more likely to get severely ill once they are infected. The gene alteration doesn't make people more likely to catch the flu, since that depends on other factors like previous immunity.

From AP Reports.

AP

4. Dutch Queen Beatrix abdicating, son will be king: The Netherlands' Queen Beatrix announced Monday that she is ending her reign after 33 years and passing the crown to her eldest son.

The widely expected abdication comes at a time of debate over the future of the largely ceremonial Dutch monarchy, but also as calm has descended upon the Netherlands after a decade of turmoil that saw Beatrix act as the glue that held together an increasingly divided society.

The queen, who turns 75 in just a few days, said she will step down from the throne on April 30. That same day, her eldest son, Willem-Alexander, will be appointed king at an inauguration in Amsterdam. He will be the Netherlands' first king since Willem III died in 1890.

Willem-Alexander is a 45-year-old father of three young daughters, an International Olympic Committee member, a pilot and a water management expert.

From AP Reports.

Homelessness Issues Raised This Week

Clubs collaborate to educate the student body

Rachel Davidson
THE SANTA CLARA

This week marks Santa Clara’s first ever Homelessness Awareness Week, organized by a coalition of seven students and supported by various departments on campus. The goal is to shed light on the poverty that surrounds the Bay Area and the rest of the world.

One of the creators of this project, junior Katya Nemas, found her inspiration from the work she did in the Tenderloin district of San Francisco.

“I thought it’d be really awesome if we brought something like that to campus to give people the chance to serve,” said Nemas. “A lot of people would like to serve but don’t know how to...I’ll help get rid of those excuses for them.”

Nemas has been planning this week-long event since fall quarter, using resources from Loyola Marymount University in Los Angeles to get suggestions and references from their annual HAW. While a national HAW already exists in November, the students involved felt that January would be a more appropriate time for this project because the coldest time of the year brings to life the realities of being homeless.

HAW has organized an event for each day of the week, sponsored

by the Multicultural Club, Santa Clara Community Action Program, various groups in Campus Ministry, Core Christian Fellowship and Christian Life Community.

One of the most anticipated nights of the week was Wednesday, where the “Faces of Homelessness” panel was held, showcasing three homeless people who discussed their thoughts, challenges and stereotypes that they have faced.

Director of the Multicultural Center Michelle Tang encourages students to stay involved beyond HAW in ongoing opportunities with SCCAP and Campus Ministry if the events of this week spark their interest. Her own department hosted the first event of the week by screening “The Soloist,” a 2009 movie based on a true story of a musician who develops schizophrenia and becomes homeless.

Educating university students is the first step to solving the homelessness problem in our backyard. According to the 2011 Santa Clara County Homeless Census and Survey, 7,045 people are homeless in Santa Clara any given night. Correcting misconceptions is the second largest part of this education. Some of the most prevalent causes of homelessness include those struggling with post-traumatic stress syndrome, who are often veterans, low-income individuals or immigrants who didn’t quite make it, patients ejected from institutions and families who struggle to find affordable housing.

“It’s so easy in our college bubble to turn the other way to issues of

ANDREW COX — THE SANTA CLARA

The Faces of Homelessness Panel took place on Wednesday, where individuals shared their stories and experiences of homelessness.

homelessness,” said senior Laura Snowden, who is a program coordinator for SCCAP’s San Jose Family Shelter placement. “There’s a really visible presence of poverty in this country that people just choose to ignore.”

SCCAP hosts five programs to help the homeless, which attract a total of 40 to 60 volunteers every week. While this department hosts fairs and tables, the staff has found that most students who volunteer have heard of the programs from word-of-mouth, or they participate

in these as part of the university’s Arrupe requirement.

“I want to make serving cool,” said Nemas. “I feel like there’s a stigma attached sometimes...to change it from that viewpoint to something like, hey, there’s an injustice here and we need to do something about it. Especially if they have the skills to do something instead of sitting around and hoping it gets better.”

Thursday’s event will be working with underprivileged kids and teens and is hosted by SCCAP from 6 to 9 p.m. This Friday, HAW will set up

a Tent City on the Benson Lawn to help students learn about the realities of homelessness through stories, statistics, and students’ volunteer experiences. Saturday marks the last day of the week, where students are offered the opportunity to join CLC, Interfaith, and Christians in Action as they make, serve and enjoy a meal with local individuals experiencing homelessness in San Jose.

CAMPUS SAFETY

Alcohol Related Medical Emergency

1/26: A student was found intoxicated and unresponsive in his room. SCU EMS, SCPD, SCFD and paramedics were contacted and responded. The student was transported to O’Connor Hospital by paramedics.

1/27: A student was reported intoxicated and unconscious at an off-campus location on Alviso Street. CSS, SCFD and paramedics were contacted and responded. The student was transported to O’Connor Hospital by paramedics.

Drug Violation

1/23: A student was found smoking and in possession of marijuana in his room. The marijuana was confiscated and disposed of.

Impounded Bicycle

1/25: An abandoned bicycle was impounded from the Leavey Center bike racks.
1/26: An abandoned bicycle was impounded from the Bannan Engineering Laboratory bike racks.

Medical Emergency

1/23: A student injured his finger when it got caught inside a cement mixer in the Bannan Engineering Laboratory. He was escorted to Cowell Health Center.
1/24: A student was reported feeling ill during a class session in St. Joseph’s Hall. CSS, SCFD and paramedics responded. She was transported to Good Samaritan Hospital by paramedics.

1/30: A student reportedly lost

consciousness and was lying on the floor of the women’s restroom in Sanfilippo Hall. CSS, SCU EMS, SCFD and paramedics responded. She was transported to Good Samaritan Hospital by paramedics.

1/27: A non-affiliate visitor injured his knee while skateboarding on campus. CSS, SCU EMS, SCFD and paramedics responded. He was transported to Valley Medical Center by paramedics.

1/27: A student injured his ankle while skateboarding and requested medical assistance. CSS and SCU EMS responded.

Suspicious Person

1/23: A suspicious unknown male was reportedly found inside a faculty member’s unlocked office, without permission. CSS responded and was unable to locate the unknown male.

Theft

1/26: Four longboards were reported stolen from outside of students’ rooms in Dunne Hall. The skateboards were returned to the respective owners.

Vandalism

1/25: Graffiti was found written on the light poles in the Third Mission Lot and Music and Dance lots.
1/25: A computer keyboard was found vandalized in the Harrington Learning Commons.

Vehicle Towed

1/23: A vehicle was towed from a reserved space for having no parking permit displayed.

OPINION

Thursday, January 31, 2013

Natasha Gupta

Five Tragedies of Our Tech-Filled Future

PHOTO ILLUSTRATION BY SAMANTHA JUDA— THE SANTA CLARA

Both George Orwell, author of “1984,” and Albert Einstein, winner of the Nobel Physics Prize, predicted that future generations would become overly dependent on technology to communicate and socialize. Take a look around: their forecasts had some merit. Nathan Wagner, Matt Miller and Sean Kenahan epitomize some of Orwell’s and Einstein’s theories, as they sit in the Bronco engrossed in their phones, not conversation.

Today, you can deposit checks with a click of a photo or meet your soulmate through a website. Soon, you’ll be able to travel using a car that drives itself. The world we live in is extraordinary; it transcends technological boundaries anyone might have imagined 200 years ago. Not surprisingly, however, much of our technological progress comes with a few concerns.

1. Kids consumed by electronics

If you’ve ever seen a baby play with an iPhone, you know our society is done for. Fixated on the bright colors and entranced by the screen’s glow, the baby is consumed, and no Fisher Price tool set can compare. I’m also referring to 10-year-old

boys with Nintendo DS’s strapped to their palms and 15-year-old girls who haven’t stopped texting since they turned 11.

Parents, please stop handing your infant a cell phone when they won’t stop crying. We are already forced to be slaves to our devices. Why start dependence earlier than necessary?

2. Bookstores

I have recently given up any hope of taking my future children to a bookstore.

Don’t get me wrong, I am just as mesmerized by Amazon’s remarkable supply chain innovation as you are, but the old Borders bookstore in my hometown is a depressing sight.

Boarded up, entirely abandoned, letters falling and paint fading, this

crushed establishment used to be a fundamental cornerstone of any respectable urban shopping center or downtown strip.

Now it’s concrete proof that our world is truly becoming what George Orwell feared in “1984” or Ray Bradbury warned us about in “Fahrenheit 451.”

It bothers me that my friends can name the three closest bars before they can tell you where to buy a brand-new book.

3. Texting at dinner

When I accepted your invitation to grab food, I didn’t realize I would be competing with your Android for your attention. Don’t be rude. Don’t text during meals — learn to put your phone away. If it’s an emergency call, you can take it outside like we did in the good old days.

4. “16 and pregnant”

Where is the show about the 16-year-olds who work two jobs and help watch their younger siblings after school? The 16-year-olds who attend class, don’t cut physics and don’t get impregnated by the first guy they see? I guess no one would watch that show, and that’s a scary thought.

5. Exergaming

The Nintendo Wii revolutionized exercise. For the first time, senior citizens trapped by their bodily limitations could once again enjoy golfing through virtual wonders and a magic white wand. Friends, if you are not over the age of 65, constrained by physical limitations or trapped in house arrest, please get outside, inhale some fresh air and

play your sports outdoors.

You’re living in sunny California, and San Jose was just voted the third healthiest city for women in America by Women’s Health magazine. So please, get up, get running and try to embrace cardiac health somewhere besides in front of a television. Trade your white wand for an actual tennis racket and feel blessed to do so.

George Orwell wrote, “If you want a picture of the future, imagine a boot stamping on a human face — forever.” While I think George is being a little extreme, there’s truth in what he implies. We should embrace shifts in technology, but we must commit to being aware of the positive and negative ways they shape our existence.

Natasha Gupta is a senior finance major.

LETTER TO THE EDITOR

To the Editor,

Indonesian garment factory PT Kizone closed in April 2011, leaving approximately 2,800 people out of work. American companies producing apparel in this factory included Nike and Adidas — but where Nike and the Dallas Cowboys paid severance to PT Kizone workers, Adidas is refusing them the money they are rightfully owed. Adidas claims not to have been operating out of the factory at its closure, but the Worker Rights Consortium, a monitoring company signed onto by Santa Clara, has proven that Adidas garments were being manufactured up until the factory closed. In 2011, Adidas made almost \$18

billion in revenue; the severance they owe the PT Kizone workers is \$1.8 million. For Adidas, this is pocket change, but for the workers and their families, the money they would receive amounts to half their total yearly income. The company also claims that the food vouchers they distributed — worth just \$500,000 and only good for one-time use — should be accepted as alternate payment, while PT Kizone workers have repeatedly stated the vouchers are essentially useless. Workers at PT Kizone have gone into debt, pulled all their children out of school, moved away from family to afford housing and faced living in extreme poverty, all because Adidas refuses to pay the

workers the money they deserve. Santa Clara’s campus bookstore continues to sell Adidas merchandise, while universities across the country have united to protest this injustice. Santa Clara’s administration should be particularly struck by Georgetown’s voiced support of PT Kizone workers, as we too are a Jesuit institution whose mission statement revolves around leadership, compassion, justice and service to others. To stop selling Adidas does next to nothing if we do not stand boldly beside other institutions and publicly speak out against Adidas, showing how important our core values are to this university. Martin Luther King, Jr. Day

has just passed, and I’d like to remind Santa Clara’s students and administration of one of the most famous sentiments this civil rights leader ever expressed: “In the end, we will remember not the words of our enemies, but the silence of our friends.” At least 2,800 people are owed thousands of dollars — money that will allow their families to survive. There are times when what is right is to stay quiet, but in this case to stay silent will not only be harmful but shameful.

Women at War: Gender Equality in Military

As Leon Panetta prepares to step down from his position as Secretary of Defense, he leaves a record of institutional change in the military. Panetta presided over the repeal of “Don’t Ask, Don’t Tell,” and the military has begun to allow women into combat.

Last week, Secretary of Defense Leon Panetta announced the U.S. military’s official ban on women in combat positions would be lifted. According to the Department of Defense, there are currently around 238,000 positions in the military unavailable to women, and with the lifting of the ban, many of those spots are going to be opened for women to apply.

According to Panetta, if a member is qualified to serve, they should have that freedom. The pronouncement comes as another historic decision under Panetta’s leadership, as he was a key player in repealing “Don’t Ask, Don’t Tell” in 2011.

Obviously, the repeal of “Don’t Ask, Don’t Tell” wasn’t without critics, and neither is Panetta’s most recent choice to open up more combat positions to women. Rep. Tom Cotton, a veteran, told a radio host, “To have women serving in infantry could impair the mission’s central task in those units. That’s been proved in study after study just as a matter of nature.”

John Piper, a megachurch minister from Minnesota, has written on his blog that coed combat is “cultural cowardice,” writing, “A man who endorses women in combat is not pro-woman; he’s a wimp.”

Wayne State University law pro-

fessor, Kingsley Browne, published a book about the issue titled “Co-ed Combat: The New Evidence That Women Shouldn’t Fight the Nation’s Wars.” Browne believes women shouldn’t be allowed to be involved in combat positions, because they aren’t as physically fit as men, as well as because women being mixed with men in combat situations might cultivate more situations of sexual harassment.

What Panetta — and countless other proponents of military equality — has fought for is a new, inclusive American military. The repeal of “Don’t Ask, Don’t Tell” and the lifting of the combat ban represent

the military taking steps to offer the type of equality for which America should be known.

If there is one lesson America should have learned by now, it’s that a lack of diversity is not ideal for decision making, and authority without diversity is a recipe for oppression and stupidity. One only has to recall President Barack Obama’s mention of Seneca Falls, Selma and Stonewall in his second inaugural address to dwell on the poor, exclusive and dominating decisions the country has made without different voices offering advice.

While effective and courageous, our nation’s military has earned a controversial reputation. The military has often asked the nation to take a “don’t ask, we don’t want to tell” approach to its politics and problems.

The 2012 Oscar-nominated documentary “The Invisible War” sheds light on the rampant sexual abuse in the armed forces. According to the film, the Department of Defense estimates that over 19,000 instances of sexual abuse happened in 2010, and 20 percent of women in the military will be sexually assaulted. And while the repeal of “Don’t Ask, Don’t Tell” was a big step in policy for gay military equality, documented harassment still occurs in the ranks of the armed forces.

The most important impact of the lift of the combat ban is that combat duty and experience are necessary for women to advance and be promoted in military leadership. Therefore, allowing women to apply for more combat-intense positions will increase the chance for diversity

in military authority, adding important voices to the conversation of what our country will do and where our country will go.

With North Korea testing nuclear missiles, controversy over the use of both foreign and domestic drones, and intervention in the Arab world always on the table, more women in the military will be better for the country.

Besides being of pragmatic benefit, increased opportunities for women in the military helps realize part of the American experiment and aids America in becoming the exceptional country it so desperately wants to be.

In the past, there has been a notion that military presence and power make America great, but in a 21st century in which both methods of warfare and ideas about equality have changed, giving women the same opportunities as men should make all Americans proud.

We cannot afford to be contrary to cultural changes due to outdated conceptions of gender and bravery, and we cannot shy away from breaking down barriers just because the systems set in place to protect against sexual abuse aren’t solid. Seneca Falls, Selma and Stonewall were all leaps in American progress, but occurred amidst controversy, bigotry and violence.

We should be proud women want to protect and serve, and in response, we should applaud and protect their thriving in military ranks.

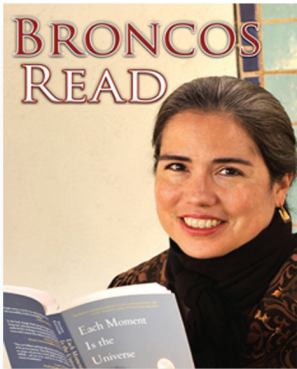

Micah Conkling of West Virginia University.

Engineers Break Down International Borders

Student-run club makes a difference worldwide

Liz Wassmann
THE SANTA CLARA

Although the club name suggests otherwise, Engineers Without Borders is not just for engineers. EWB is open to all majors, since more than just engineering skills are needed to ensure the success of the projects.

Santa Clara's club is just one chapter of the national club, Engineers Without Borders-USA, which designs and implements projects for the benefit of marginalized communities in the developing world.

The Santa Clara chapter organizes a trip to Honduras every summer to work on a continuing project that supplies water to a rural village.

Senior and club secretary Terra Oldham, who went on the trip this past September, explained that the village of El Pital in the Cangrejal River Valley does not have enough water in general, let alone enough clean water.

In El Pital, parasitic infections and dysentery are the two main sources of illness, and both originate from contaminated water.

This summer, for the first time, the club is planning two separate trips to Honduras: one will focus on

Russell Williams, Rob Golterman, Elliot Martin and Colin Boyle (left to right) take water samples in rural Honduras to test for bacteria to reduce disease in neighboring villages. COURTESY OF ENGINEERS WITHOUT BORDERS

sanitation and the other on surveying. A real focus is placed on educating the community about the water system to ensure it stays productive even after the students leave.

Over the past four years, the club has tripled in size. There are now about 25 regular members.

Throughout the year, EWB hosts

various fundraising events such as a Honduran Culture Night and this year, the first ever Engineering Kickball fundraiser, which is coming up in February.

In addition, the club was given the Most Sustainable Club Award by the Office of Sustainability and the Council of Sustainability for the

first time this year.

The club also contributes in rural Honduras by tutoring local school children in science, math and (of course) engineering.

Senior Rachel Reid, EWB event coordinator, stressed that students from all majors all welcome. Because of the recent addition of an educa-

tion committee, there is a real need for students who are strong writers or have studied Spanish to help teach the Honduran community about the project.

Contact Liz Wassmann at ewassmann@scu.edu or call (408) 554-4852.

CLUB BRONCO PROVIDES ENTERTAINMENT

SAMANTHA JUDA — THE SANTA CLARA

Student a cappella group, Supertonic, performs as a part of Club Bronco last night. "The JurassicC" and "The Vanities" also performed at the event sponsored by Santa Clara's student-run radio station KSCU, the Office of Sustainability, Locatelli Student Activity Center and Associated Student Government. Their performances set the mood for the various activities going on in the Bronco like crafts and pool.

Students Seek Leadership Spots

Hopeful applicants endure demanding process

Samantha Nitz
ASSOCIATE REPORTER

Many students this week will be preparing to face yet another round of interviews and activities that will decide which few individuals will become the Orientation Leaders and Community Facilitators for next school year.

Over a hundred people submitted applications, however there are not that many spots available for these competitive positions.

These positions are in high-demand partly because of their reputations as jobs that provide free room and board. Community Facilitators live within the dorms and build a sense of community with the residents while upholding university

standards. Orientation Leaders live on campus over the summer in order to guide incoming freshmen at orientation and help facilitate a smooth transition into the college lifestyle.

Each job has a different interviewing process. A typical student applying for the positions can participate in anything from single and group interviews to skits about different aspects of college life and the Residential Learning Communities. After each day of the interviewing process, a series of emails are sent out eliminating and advancing applicants.

Those who applied for Community Facilitator positions ranked the top dorms and RLCs they would prefer working in and then attended the subsequent interviews. Those who advance are admitted into a smaller selection pool for their top-ranked RLCs.

While Swig Hall has the most CF positions available, dorms such as McLaughlin Hall and Walsh Hall only have a total of six spots. When

there are over 100 applicants, the challenge is daunting for the hopeful students.

In a similar process, those who applied for Orientation Leader spots are put through an interview process which includes group interviews followed by one-on-one interviews.

This past year, there were only 27 students who remained on campus during the summer to be OLs. This year, the Office of Housing and Resident Life will need to find a way to fill those positions with another group of charismatic and diverse students.

No matter how competitive the process may be, it’s guaranteed that the jobs will all be filled with students who will work to make campus life thrive next year.

Good luck to all the students who are continuing on this week in the interview process and congratulations in advance to all of those who are chosen.

Question of the Week by Samantha Juda

What is one thing you want to accomplish before the end of the quarter?

Mariah Adcox, '13
“Pass anatomy. Dead or alive.”

John Drayton, '14
“Passing my classes.”

Anna Sarocco, '16
“I want to be actively involved in a club.”

Max Herrmannsfeldt, '13
“Vanquish my hip flexor injury for good so I can play ultimate (frisbee) at full speed again.”

Anne McDonald, '16
“I want to get a 4.0.”

TOP REASONS TO LEAVE YOUR COUCH THIS WEEK

RYAN SELEWICZ — THE SANTA CLARA

1/31 | THURSDAY

Into the Wild: Forge Work Day
Time: 10:30 a.m. - 1:30 p.m.
Location: The Forge Garden
Why Go? Do you enjoy working with your hands? We will be preparing wood for making planter boxes: cutting, de-nailing, and pre-drilling will be from 10:30 a.m. to noon, and noon to 1:30 p.m. will be building boxes.

Men's Basketball vs. University of Portland
Time: 7 p.m.
Location: Leavey Center
Why Go? Support the Broncos in their game against the Pilots. Wear white for the whiteout, and be prepared for a half-time 3 vs. 3 game.

Homelessness Awareness Week: Volunteer with SCCAP
Time: 6 p.m. - 9 p.m.
Location: SCCAP Office, Locatelli Student Activity Center
Why Go? Encounter the realities of homelessness by working with youth, followed by a dessert reflection in the SCCAP office.

2/1 | FRIDAY

Forge Work Day
Time: 1 p.m. - 5 p.m.
Location: The Forge Garden
Why Go? Take a break and get your hands dirty working in the university's urban garden.

Musical Mavericks Series: Santa Clara New Music Festival
Time: 7:30 p.m.
Location: Recital Hall
Why Go? Celebrate the music of Pauline Oliveros with guest artists, Santa Clara faculty and students.
Cost: \$5 for student tickets

Men's Rugby vs. Stanford University
Time: 7 p.m.
Location: Bellomy Field
Why Go? Cheer on the SCUTS Rugby Team as they defend their DIAA conference title in their first game of the season against Stanford. They are looking to repeat last years 38-12 victory.

Homelessness Awareness Week: Tent City
Time: All Day
Location: Benson Memorial Center Lawn
Why Go? Stop by Tent City to learn about the realities of homelessness through stories, statistics and students' volunteer experiences with homelessness.

2/2 | SATURDAY

Musical Mavericks Series: Santa Clara New Music Festival
Time: 7:30 p.m.
Location: Recital Hall
Why Go? Celebrate the music of Pauline Oliveros with guest artists, SCU faculty and students.
Cost: \$5 for student tickets

Women's Basketball vs. Brigham Young University
Time: 2 p.m.
Location: Leavey Center
Why Go? Support the Broncos in their game against the Cougars. Get your Saint Mary's College tickets and earn double Ruff Rider points for the Pink Game.

2/3 | SUNDAY

Bronco Bench 5k Fun Run
Time: Registration opens at 9 a.m.
Location: In front of Benson Memorial Center
Participate in the second annual fun run put on by the Bronco Bench Foundation. This run gets you active and raises money for student athlete scholarships.
Cost: \$25 for students

2/4 | MONDAY

APB Presents: College Humor
Time: 8 p.m.
Location: Locatelli Student Activity Center
Why Go? Come see College Humor comedians Streeter Seidell, Josh Rabinowitz and Thomas Dale in a live comedy performance. Tickets are on sale in Benson Memorial Center.
Cost: \$5

SAMANTHA JUDA — THE SANTA CLARA

SAMANTHA JUDA — THE SANTA CLARA

2/5 | TUESDAY

Food and Agribusiness Institute Immersion Information Session
Time: 5:30 p.m.
Location: Lucas Hall I26
Why Go? Learn about this summer's immersion trip to Burma.

Club Bronco
Time: 6 p.m. - 8 p.m.
Location: The Bronco
Why Go? Club Bronco is back. It's a great opportunity come check out some Bronco talent and enjoy your favorite meal.

2/6 WEDNESDAY

Food and Agribusiness Institute Immersion Information Session
Time: 5:30 p.m.
Location: Benson Conference Room I15
Why Go? Learn about this summer's immersion trip to Burma.

Music at Noon: Kristen Strom Quartet
Time: 12 p.m.
Location: Recital Hall
Why Go? Saxophonist Kristen Strom performs songs from her new album, "Sojourn,"

featuring Scott Sorkin on guitar, John Shifflett on bass and Jason Lewis on drums.

ABP Presents: Traveling Petting Zoo
Time: 1 p.m.
Location: Kenna Hall Lawn
Why Go? A zoo? Yes, a zoo! Swing by and hang out with all of your favorite animals.

To suggest events for the calendar please contact Samantha Juda at: sjuda@scu.edu.

Santa Clara @ Fresno Pacific	Sat. 2/2	TBA

BRONCO BRIEFS

Ruff Riders

Head Coach of the men’s basketball team, Kerry Keating, wants the Ruff Riders to be the team’s sixth man. At Thursday’s game against the University of Portland, he’s ready to put his money where his mouth is. Keating is encouraging the Ruff Riders to attend Thursday’s game with his latest idea — a series of \$100 cash giveaways post-game.

For every 100 Ruff Riders in attendance, Keating will have a drawing for \$100 after the game.

Each Ruff Rider will be given a ticket for the post-game drawing. If there are 1,000 Ruff Riders there, he will give away 10 \$100 bills.

“I want to encourage all the Ruff Riders to come to the game on Thursday. The more friends they bring, the most chances they will have to win \$100 after the Portland game,” said Keating. “I want the Ruff Riders there — they can help us win this game and they will be rewarded for their attendance post-game.”

Men’s Tennis

The Santa Clara men’s tennis team, ranked No. 36 in the country, was picked to finish third in the West Coast Conference preseason poll. Pepperdine University and the University of San Diego were the two teams that were picked to finish ahead of the Broncos this year. Santa Clara is off to a 3-1 start, including a big win over Boise State University (No. 38). They will next be in action on Friday against the University of Washington (No. 22).

Broncos Win on the Road Again

SAMANTHA JUDA — THE SANTA CLARA

Santa Clara men’s basketball Head Coach Kerry Keating talks to his players during the second half of the Broncos’ home loss to Brigham Young University earlier this year. The Broncos have turned their conference season around after losing three of their first four games and now sit at 4-3 in fourth place.

Team rebounds after tough league start, now tied for fourth

Nick Ostiller
THE SANTA CLARA

The Santa Clara men’s basketball team has come to rely on its unique core of Kevin Foster, Marc Trasolini and Evan Roquemore, holding the distinction of being the only team in the nation with three players who have scored over 1,000 points in their careers.

The game plan was no different Saturday afternoon, with the three standouts shouldering the load while leading the Broncos to a 64-50 road win against the University of San Diego. It was the third consecutive West Coast Conference victory for Santa Clara (16-6, 4-3 WCC), and the team’s fourth in a row overall.

Trasolini led the way with 23 points and eight rebounds while Roquemore and Foster finished with 18 points and 15 points respectively. No other starter scored for the Broncos, and the bench only provided eight total points. Although the stat sheet was lacking diversity, Santa Clara Head Coach Kerry Keating is comfortable with the leadership of his veteran players.

“Our seniors are doing a great job,” Keating said. “At this point they understand the clock (on their careers) is ticking you don’t have many more opportunities left. They’ve been through a lot in their time here, two of them being fifth-year guys and

two of them being guys who have started part of their career. It’s only natural they provide the type of leadership through their experiences.”

Aside from helping the Broncos stay in the WCC race, Trasolini and Foster both ascended in the Santa Clara record books during the team’s victory over the Toreros (11-11, 4-3). Trasolini recorded three blocked shots in the contest, moving him to No. 2 in career blocks for a Bronco. His game-high 23 points also vaulted him to No. 11 in career points, passing Bud Ogden and Mike Stewart. Keating appreciated the defensive intensity he received from Trasolini.

“(Trasolini) blocks shots, he provides some sense of understanding back there,” said Keating. “Trasolini has been through a lot and can help the younger guys like Rob Garrett and Yannick (Atanga) with understanding things at times.”

Foster also eclipsed a Santa Clara milestone with his 15 points, passing Bill Cartwright (2,116 points, 1975-79) to become No. 3 all-time in WCC history with 2,118 points.

“It’s special,” said Foster of his accomplishment. “It’s been a good conference for a lot of years. I’m looking at the big picture now and I want to make sure we go out on a winning note.”

While the scoring accolades are certainly impressive, the team realizes that it is going to take more than offense in order to finish with the success that Foster is hoping for. The backcourt tandem of Foster and Roquemore, who serve as the Broncos’ first line of defense, have taken it upon themselves to devote more attention

to holding down the opposition.

“I need to make sure I’m not a liability on defense,” said Foster, who is averaging a career-best 2.6 steals per game. While the Broncos’ scoring machine from Texas can fill it up with the best of them, he emphasized the importance of “watching film and making sure I put the effort in on the defensive side.”

Roquemore’s 1.5 steals per game is also the best output of his three-year career. He had two against the Toreros, and together with Foster, held San Diego’s starting guards to just 17 points combined.

“We’re defending better,” said Keating. “A lot of games get closer into January and February. We’re doing a better job defending from the start of games and that’s helped us at the end.”

Defense will be key for the Broncos if they want to extend their four-game winning streak. The upcoming schedule for the Broncos includes tonight’s matchup with the Portland Pilots (8-14, 1-6) at the Leavey Center followed by a road game against the Brigham Young University Cougars (16-6, 6-2) over the weekend. Although Portland is saddled in last place in the WCC, Keating does not want his team to overlook the matchup, despite BYU looming on the horizon.

“We’ve done a good job of not looking ahead,” said Keating. “We’re over-conscious of that. It’s all about Portland on Thursday. We’ll worry about BYU at 9:30 (p.m.) on Thursday or whenever the game ends.”

Contact Nick Ostiller at nostiller@scu.edu or call (408) 554-4852.

ATHLETE OF THE WEEK

Ricki Radonovich
Women’s Basketball

The junior posted a career high 24 points, including six 3-pointers, during the Broncos’ 71-68 home loss to the University of Portland.

How do you stay focused after two tough losses?

Our emphasis has been on focus and energy during practice so we can get ready to play top teams.

What was working for you in the

Portland game?

I worked on my footwork Friday before practice and we talked about how I was going to shoot the ball well.

Favorite pre-game routine?

Dance parties in our locker-room always help. We also get hyped when the band walks by — we love playing at home.

Men’s Tennis Ready to Continue Past Success

Historic 2012 campaign brings high hopes for 2013

Ryan Mahoney
THE SANTA CLARA

Buzz around the Santa Clara men’s tennis program has never been louder.

Santa Clara’s men’s tennis team is coming off their best season ever, one that included an NCAA tournament berth, a 22-6 overall record, and a first-round upset of the University of Texas.

The program came into the season ranked 35th in the country, the best in the program’s history at Santa Clara. Although some challenges lay ahead for the Broncos, hopes are high among everyone involved that last season was a building block, not a high-water mark for the program.

Junior John Lamble is optimistic about the team’s chances this season, despite losing Nicolas Vinel and Maxime Armengaud to graduation.

“Even though we lost a few seniors from the team last year, we still have a lot of old guys on the team this year,” said Head Coach Derek Mills.

Lamble said, “We still have a lot of experience on the team.”

Lamble, a junior from nearby Saratoga, plays as the No. 1 singles player for the Broncos. Last season, he garnered the program’s highest ever preseason at No. 65. This season, he aspires to do even better.

“I think we’re just as motivated. We want to do better than last year,

go one round further in the NCAA Tournament,” said Lamble. “I feel like we’re just as talented this year if not more talented.”

The Broncos will look for production from Ilya Osintsev, a sophomore who was named the West Coast Conference Freshman of the Year last season. The team also adds three new players in Ashot Khacharyan, a freshman from Russia, Tomasz Soltyka, from Poland, and Matt Kecki, a Sacramento native who will spend his final year of eligibility here playing for Santa Clara while pursuing a graduate degree. Kecki previously had a storied career at the University of Southern California.

Mills, in his sixth season at the helm at Santa Clara, is also optimistic that this season can be just as good, or better, than last year.

“I think the guys still have a chip on their shoulder. They want to prove they can do it without the guys we lost last year,” said Mills. .

“We’re trying to build the chemistry right now and I think we’re getting there. We started off 3-1.”

The Broncos have already dropped a tough match against the 20th-ranked University of Michigan Wolverines in a tournament at the University of California, Berkeley, but won the consolation match against No. 38 Boise State University. The Broncos will continue their out of conference play with a trip to No. 22 University of Washington, another match with Boise State in Seattle, and a visit to Weber State University. Then the Broncos must face the tough WCC schedule, which includes the 7th-ranked Pepperdine University

BRIAN KLAHN — THE SANTA CLARA

The Santa Clara men’s tennis team is coming off of their best season ever, which included a trip to the NCAA Tournament and an upset over the University of Texas. The team and Head Coach Derek Mills have their eyes set on a deeper run into the tournament this year.

Waves and the 22nd-ranked University of San Diego Toreros.

“Pepperdine, Brigham Young University, and San Diego are the top teams,” said Mills. “A lot of the teams are getting better in the WCC, they’ve seen our success and its motivated some other teams, unfortunately, to get better. We know we still have a lot of work to do.”

Lamble added, “Pepperdine is

always strong. They’ll be a top-5 team. They have a legitimate shot to win the NCAAs so they’re going to be tough. BYU is a good team. San Diego has been good in recent years, too. They will be big matches for us.”

The Bronco will play all but three of their matches at home after Feb. 9, and hope to have a lot of support from local fans and especially

students. The Broncos posted an impressive 10-1 home record last year. Should they be able to do that again this season, there’s no reason to believe we won’t be following our Broncos in the NCAA tournament once again.

WOMEN’S BASKETBALL DROPS TWO CLOSE ONES

GEOFF BRAY FOR THE SANTA CLARA

It came down to the wire in consecutive home West Coast Conference games for the Santa Clara women’s basketball team, but the team ended up walking away from the weekend with a 0-2 record. They dropped the first game to Bay Area rival Saint Mary’s College 56-50 before falling to the University of Portland 71-68. The team will be on the road tonight when they face the University of San Diego.

Read Option
Ready for the
Super Bowl

Just one year and a few months after the introduction of the read-option system in the NFL, the San Francisco 49ers have a chance to win a title using it.

In early November of 2011, then Denver Broncos starting quarterback Tim Tebow began doing something that nobody in the NFL had ever done before.

Instead of taking the snap, dropping back into the “pocket” created by the offensive line, and searching for an open receiver, he took the snap with the intention of running up the middle, the way a power running back would.

It not only incorporated the quarterback as a runner, but had plays specifically designed to allow the quarterback the “option” to run, say left, and pitch the ball out to a running back further to his left if he “read” that there was an opening for his teammate.

The “read-option” offense, long a staple of the college game, had arrived in the NFL.

“You have the option to run or pass, and the read-option running plays cause aggressive defenses to become slower,” wrote Mike Preston of the Baltimore Sun. “Teams are running more pre-snap motion with it and the offense is tailor-made for a quarterback who is athletic, instead of merely an athletic quarterback.”

Tebow and the Broncos made the playoffs last year. This year, three quarterbacks operating under this scheme made it. Russell Wilson of the Seattle Seahawks, Robert Griffin III of the Washington Redskins, and of course, Colin Kaepernick of the Bay’s own San Francisco 49ers.

The 49ers incorporated the read-option system into the “pistol” offense, which has been in use for a few years in the NFL.

The pistol is a combination of the traditional shotgun and single-back formation where the quarterback lines up three to four yards behind the center and the running back is three or four yards behind the quarterback.

Kaepernick and the 49ers will look to continue their tremendous success with the pistol offense against the Baltimore Ravens in this weekend’s Super Bowl.

“I think everybody saw what he did last year,” Kaepernick said of Tebow at Sunday night’s news conference after the 49ers arrived in New Orleans from San Francisco. “I was confident before I saw what he was doing. At the same time, that was also another opening for me. To be able to use another tool to help me on the field.”

CBS analyst Shannon Sharpe said, “Until these defensive coordinators find a way to take this particular element away, you’re going to see more and more guys come into the league that can do this and teams are going to incorporate that into their offense.”

There is no better sign that a new era has come to the NFL. The days of the Mannings and Bradys as strict pocket passers is coming to an end. The new generation of more dynamic and athletic quarterbacks has arrived.

Henry Gula is a sophomore communication major.

The Leos, Lifelong Teammates

Vanessa and Lindsay grew up with a basketball in their hands

Chris Glennon
THE SANTA CLARA

Following in an older sibling’s footsteps can be a daunting task, one that some might avoid at all costs. But for Vanessa Leo, a red-shirt freshman for Santa Clara’s women’s basketball team, the opportunity to do just that was something she embraced. Her older sister, Lindsay, is a senior and one of the best players on the team.

Vanessa, four years younger, has always followed in Lindsay’s path. “It helped a lot to be able to see what she went through,” Vanessa said. “The coaches, players, the school were all very important, but having Lindsay here was also huge.”

They described their family as a basketball family. Their father, Guy Leo, played college basketball at the University of California, Santa Barbara.

“My dad has always played basketball,” said Lindsay. “He was the one to put the ball in our hands. He knows the game so well and has a great passion for it. Our mom also enjoys the game.”

Lindsay said her first memory of basketball was in about second grade, playing basketball out on the blacktop with her dad. For Vanessa, her first memory was playing at the YMCA Club on 8-foot hoops. “They had a six-point limit per player so I always got taken out early,” Vanessa said. “I could almost dunk on those things.”

Both sisters said that they have always been taller than most, and that it was clear basketball was going to be their sport. Height runs in the family. Guy is 6 feet 8 inches, and their mom, Barbara Leo, is 5 feet 11 inches.

“Our mom made us dance to get a little balance in our life,” Lindsay said. “That might be why we have some coordination.”

Both played volleyball growing up, but when they got to high school, it was time to dedicate themselves to hoops.

“When we got to (Archbishop Mitty High School) we kind of had to pick one sport,” Vanessa said. “They have a great basketball program.”

That tradition of Mitty’s program was something both Lindsay and Vanessa helped continue. Lindsay played in three state championship games, winning two of them. Vanessa, who was a freshman dur-

SAMANTHA JUDA — THE SANTA CLARA

Vanessa and Lindsay Leo, sisters, have grown up playing basketball together. Both were forces to be reckoned with at perennial powerhouse Archbishop Mitty High School before furthering their basketball careers in college at Santa Clara.

ing Lindsay’s senior year, was called up from the junior varsity team for the playoff and eventual state championship run that Lindsay helped lead.

When they weren’t playing for Mitty, the Amateur Athletic Union circuit was where the sisters refined their games. “I just remember the AAU days,” Lindsay said. “We put in so much time there. The goal was always to get a college scholarship.”

Lindsay did get a scholarship right out of high school, but it was with San Diego State University, not Santa Clara.

“It just didn’t work out,” Lindsay said. “The atmosphere wasn’t

right for me.”

That experience was something Lindsay said she tried to pass on to Vanessa when she was making her college decision.

“I was always like the guinea pig,” Lindsay said with a chuckle. “I’ve been where she’s been so my experience can really help. I definitely want to be a good role model.”

Now with the two playing side by side, Vanessa said she has picked up a lot from Lindsay.

“This is my first full year practicing every day,” Vanessa said. “Sometimes I can get a little amped up, but Lindsay is there to help me out

when that happens.”

Lindsay seemed to agree. “We know each other so well, we don’t even have to be talking to each other to tell if something is a little off,” she said. “If she is too excited, I let her know she is giving good effort, but controlling that energy is important too. I try to stay positive.”

Even though Lindsay’s playing days are winding down, if the past is any indication, Vanessa should be ready and prepared to once again fill her older sister’s shoes.
